QCPR Feedback Solutions

SkillGuide

The hand-held SkillGuide device provides a tethered "plug and play" feedback option that can be used for standalone training and as a supplement to QCPR Training app, SkillReporter app, or SimPad PLUS with SkillReporter. SkillGuide is compatible with Resusci Anne QCPR, Resusci Junior QCPR, Resusci Baby QCPR, Little Anne QCPR, Little Junior QCPR, and Little Baby QCPR.

123-30050 SkillGuide with extension cable

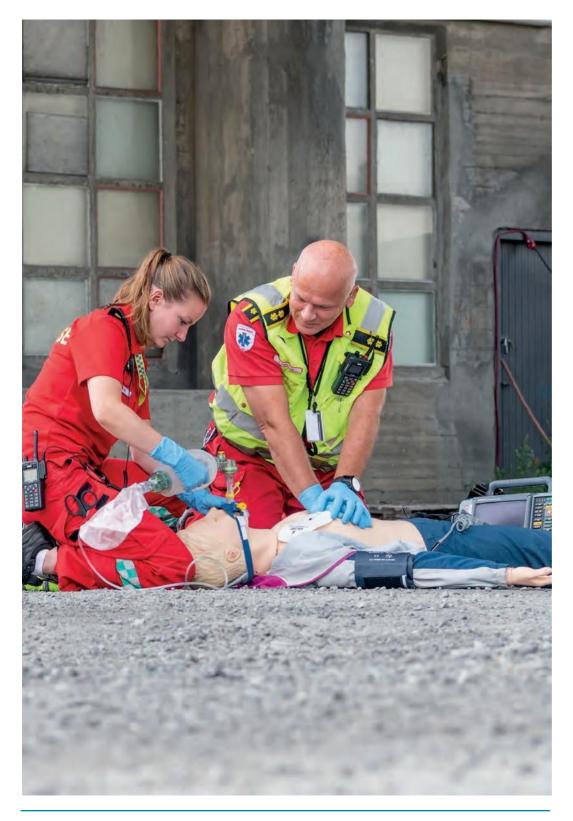

SimPad PLUS with SkillReporter

SimPad PLUS with SkillReporter provides QCPR feed-back on arugged, Laerdal-dedicated SimPad PLUS tablet. The device features multi-manikin connectivity, CPR timeline view, ShockLink device compatibility, and CPR for Teams mode. SimPad PLUS with SkillReporter is compatible with Resusci Anne QCPR, Resusci Junior QCPR, Resusci Baby QCPR, Resusci Anne Advanced SkillTrainer, and Resusci Anne Simulator.

Resusci Anne QCPR

The world's first resuscitation manikin is now smarter than ever. Now app compatible, Resusci Anne QCPR helps elevate CPR training to a new level of precision and proficiency. By training with the same protocols, equipment, and techniques used in real emergencies, professional first responders can perfect both individual skills and teamwork.

Resusci Anne QCPR is available in the following main configurations

Torso	Full Body	Name	Description
171-00160	171-01260	Resusci Anne QCPR	QCPR adult manikin for use with feedback devices

SimMan 3G PLUS

Built on decades of expertise, SimMan 3G PLUS offers afully immersive simulation experience with heightened realism.

Designed to represent a diverse range of patient scenarios to help prepare learners for real-world situations, SimMan 3G PLUS introduces interchangeable face skins for diversity training and full articulation for realistic patient handling. Now you can also train with real clinical devices, in compliance with current guidelines.

Training individually or in ateam, learners can practice critical skills such asdecision-making, team communication, and patient care. With this improved and realistic feature set, learners encounter complex medical casesall in a risk-free environment. SimMan 3G PLUS ensures that when it's real, they'll be ready.

SimBaby

Advanced training in all aspects of pediatric care

SimBaby is a tetherless simulator designed to help healthcare providers effectively recognize and respond to critically ill pediatric patients. The SimBaby simulator represents a 9-month-old pediatric patient and provides a highly realistic manikin that meets specific learning objectives focusing on initial assessment and treatment.

246-00050 SimBaby, Light 246-00150 SimBaby,

Medium

246-00250 SimBaby, Dark

SimBaby with Tracheostomy

Help improve tracheostomy care training and critical care for pediatric patients.

SimBaby with Tracheostomy is a 9-month-old pediatric simulator with a controllable tracheostoma. It allows you to train for specific learning objectives on initial assessment and treatment, in addition to realistically simulating tracheostomy care.

Improving patient outcomes

It takes a team

Allow PICU teams and in-hospital care providers to experience correct insertion of tracheal tubes on a pediatric patient. Increase their proficiency to act quickly during high-stress experiences.

Care at home

The best place for long-term care is at home. Train parents and caregivers on correct procedures so that cannulated babies are well cared for in their own homes.

Adjustable tracheostoma Control the tracheostoma size so that learners can practice on realistic tracheal tube insertion.

Respiratory Care Solutions

A comprehensive training solution

Our Respiratory Care Solution is the only training program that offers everything you need to get learners up to speed quickly from basic to advanced ventilation management. Unlike traditional simulation training, you don't need sim-rooms, classrooms, or scheduled training sessions to start your program. This systematic step-by-step solution ensures competence and consistency and enables you to track progress along the way.

Effective respiratory care training in 3 steps

Step 1: Prepare your learners

Mechanical Ventilation e-Learning

Our mechanical ventilation e-learning module is designed to help your learners better prepare for respiratory care training. This adaptive learning solution will get learners up to speed on the basics of mechanical ventilation before training on a simulated ventilator or an actual ventilator.

Mech-Vent-Bundle 1 year subscription for unlimited numbers of users. Applicable when bundled with TruVent and/or ASL 5000 Lung Solution

Mech-Ventilation 1 year subscription for unlimited numbers of users. Applicable when sold as a stand-alone solution

Step 2: Build competence

TruVent

TruVent is an innovative virtual simulation app to teach ventilation management safely without the need for a ventilator or a simulator. With TruVent, learners with limited experience can gain the basic skills needed to operate a ventilator with ease.

TruVent-001 Annual Subscription

for 1 Instructor + 1 Student

TruVent-002 Annual Subscription

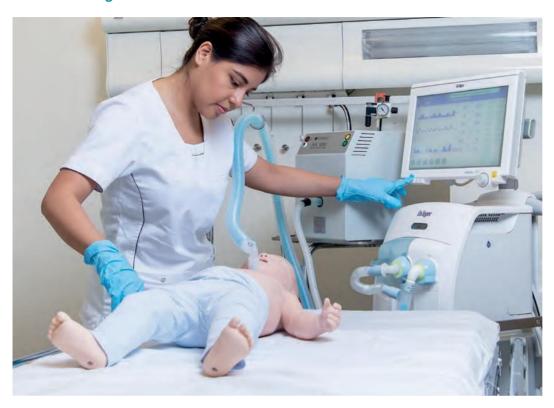

for up to 16 Users

TruVent-003 Annual Subscription

for Unlimited Users

Step 3: Master advanced ventilation

ASL 5000 Lung Solution

ASL 5000 Lung Solution

Advanced Ventilator Management Training for SimMan 3G PLUS, SimMan 3G, SimMan 3G Trauma, SimMan Essential/ Essential Bleeding, SimMan ALS, Nursing Anne Simulator, and SimBaby.

This collaboratively developed solution integrates IngMar Medical's ASL 5000 Breathing Simulator for high-fidelity management training in respiratory care, critical care, pulmonology, anesthesia, and emergency medicine. It can simulate any respiratory condition you may encounter, on any ventilator in any mode of ventilation.

420-11950 ASL 5000 Lung Adapter, adapter and LLEAP plugin 420-11955 ASL 5000 Lung Solution Adapt.Plugin, ASL5000

TruMonitor

Give healthcare providers a realistic platform to learn from

TruMonitor is a stand-alone training solution that allows learners to interpret vital signs as they will in real clinical settings. With TruMonitor, your learners will experience realistic training scenarios, with an emphasis on diagnosing and improving critical decision-making skills.

Instructors can create and control different scenarios to conduct true- tolife medical simulation training. Students will learn how to react to changes in vital signs, how to interpret ECG, how to perform pacing and defibrillation and more relevant actions can be introduced as the scenario evolves.

With only two tablets (iOS or Android), instructors and learners can experience atraining solution that takes ACLS training to the next level. TruMonitor is a cost-effective alternative to using real equipment and can be used in any training situation — onsite, in-situ, in the classroom, or remotely — regardless of student and instructor location.

TruMon-001 Annual Subscription

for 1 Instructor + 1 Student

TruMon-002 Annual Subscription

for up to 16 Users

TruMon-003 Annual Subscription

SimStart

Increased realism with a simulated AED and defibrillator monitor

SimStart is a portable and affordable training solution to simulate the use of an AED or adefibrillator monitor. Integrate SimStart with any Laerdal manikin or patient simulator to achieve a more comprehensive and realistic simulation training. SimStart can also serve as an easy entry point for organizations looking to get started with simulation training.

Track vital signs

Add AED or defibrillator monitor to your simulation scenarios to provide learners with a lifelike learning situation.

Capture data

Capture, store and track progress of every learner. All events are automatically registered and logged with LLEAP simulation software, providing richer debriefing and reporting.

Improve performance

Realistic training combined with data analysis provides agood foundation for quality improvement initiatives.

285-00001 Complete SimStart Solution

SimJunior

SimJunior is an interactive pediatric simulator, designed by Laerdal with the American Academy of Pediatrics to meet the education and training needs of healthcare providers.

Resusci Anne Simulator

BP arm left

Resusci Anne Simulator has been designed for the unique training needs of emergency care, in both pre-hospital and inhospital environments - transforming the simulation exercise into amobile and dynamic learning experience for both the instructor and the student.

150-22000 RA-Simulator AED Link, IV-arm left, Consumabl es: Adult IO Leg Skin BP arm right (incl. ShockLink) 205-10250 Tibial IO Pad (10-pack) 150-23000 RA-Simulator AED Link, IV-arm right, 212-15250 Airway Lubricant Spray Can BP arm left (incl. ShockLink) 252090 (180ml) 150-27000 RA-Simulator Paddle, IV-arm left, BParm right 375-50550 Vein System, MV Arm 150-28000 RA-Simulator Paddle, IV-arm right, Manikin Wipes (50-pack) 152400

Compatible with

SimPad PLUS (LLEAP and SkillReporter) and TeamReporter app.

Resusci Anne Advanced SkillTrainer

Resusci Anne Advanced SkillTrainer offers high quality, yet relatively low cost, advanced skills training.

151-22000 Resusci Anne Advanced SkillTrainer AED Link, IV-arm left (incl. ShockLink)

UMedic Cardiology Curriculum

The UMedic Multimedia Computer Curriculum is apatient-centered system that has been shown to enhance the learner's bedside examination skills while also teaching patient histories, laboratory data and treatment. Bedside skills in UMedic are taught through video demonstrations of Next Generation Harvey®, The Cardiopulmonary Patient Simulator, a full-size manikin that simulates the physical findings of essentially any cardiac disease.

UMedic can be used linked to Next Generation Harvey, The Cardiopulmonary Patient Simulator, or independently to provide a comprehensive curriculum in cardiology

Extri Kelly

Extri Kelly is a durable, rugged, fully articulated training manikin ideal for extrication and rescue exercises.

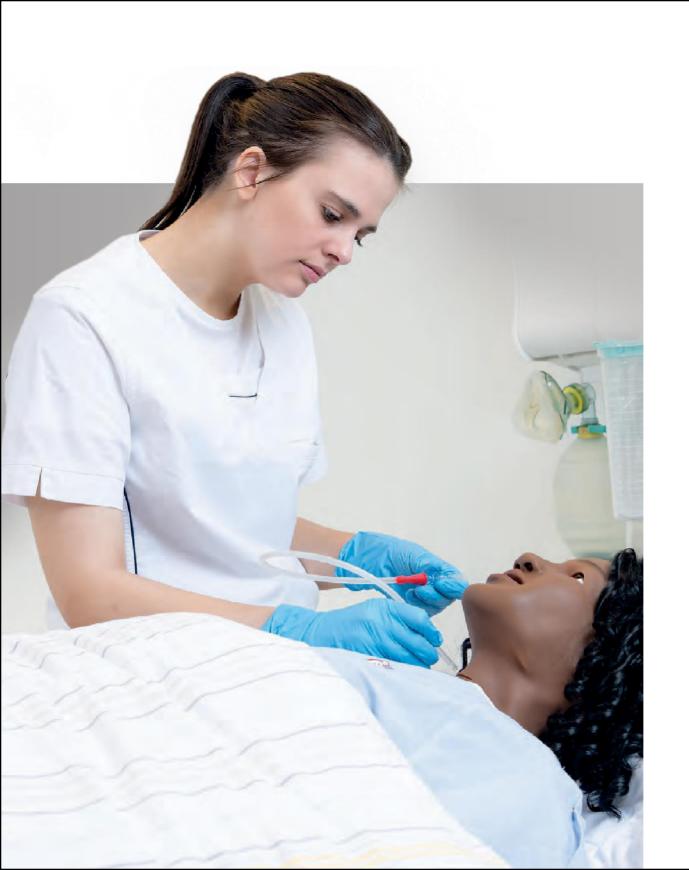

Crash Kelly

Crash Kelly is a durable, rugged training manikin with an intubation head for advanced airway management training and realistic articulation allowing the manikin to be placed in various settings for extrication or rescue.

Nursing Anne Simulator

One Simulator - Many Patients

Designed based on input from leading nursing educators from around the world, this engaging and robust modular platform enables nurses to practice a wide range of competencies both as a skills trainer and as a highly realistic patient simulator.

Learners can safely and realistically practice core nursing skills from basic assessments and critical thinking to advanced interventions.

Interchangeable Catheterization and Enema Trainer

The Interchangeable Catheterization and Enema Trainer is a life-size female pelvis with interchangeable genitalia designed for practicing urologic and rectal access gastrointestinal care procedures.

375-21001 Catheterization and EnemaTrainer

325-00250 Dorsogluteal Injection Pad - Female 325-00150 Ventrogluteal Injection Pad - Female

Fundus Skills and Assessment Trainer

The Fundus Skills and Assessment Trainer features the normal anatomy of the status-post or postpartum female abdomen designed for training fundus assessment and massage skills.

375-22501 Fundus Skills and Assessment Trainer

Consumables: 300-00750 Simulated Blood - Red 375-22950 Urinary Valves, Fundus

In-Service Home Care Training Simulator

The In-Service Home Care Trainer is a life-size male pelvis with interchangeable genitalia designed for practice of urinary catheterization and enema procedures with the addition of stoma and wound care.

375-20001 In-Service Home Care Training Simulator

Consumables
300-00150 Thigh Injection Pad
300-00250 Ventral Gluteal Injection Pad - Male
300-00350 Dorsal Gluteal Injection Pad - Male

The ideal solution when caring for two

SimMom

- An advanced, full-body simulator available in both manual and automatic delivery modes
- Covers all stages of labor from antepartum to postpartum
- Provides opportunities for enhanced in-situ training with cross-functional teams to work collaboratively
- · Train for the low-frequency, high-risk incidents
- Prepare learners to recognize and respond to potential high-risk births and postpartum complications such as PPH
- Controlled wirelessly with LLEAP, Laerdal's simulation software

MamaBirthie

- Simple simulator that can be worn on a standardized patient or mounted on atable
- Ideal for practicing maneuvers and skills training independently or peer-to-peer
- Train skills including abdominal and vaginal examinations, normal birth, vacuum-assisted delivery, shoulder dystocia and breech
- Practice on communication and collaboration with the mother through role play
- Use MamaBirthie as askills trainer to best prepare learners for high fidelity simulations on SimMom

SimMom

SimMom is atetherless, advanced full body birthing simulator with accurate anatomy and functionality to facilitate multi-professional obstetric training of birth management, with both manual and automatic delivery modes.

Providing an opportunity for cross-functional team training in any environment from ERto Labor and Delivery, SimMom enables both novice learners and healthcare providers to practice and prepare for realistic events so that more lives can be saved.

Take your simulation training further

Make the most of your SimMom with a range of integrated upgrade options to enhance your simulation.

Add a flat abdominal skin to your SimMom to allow greater versatility in addressing simple general women's healthcare.

The optional Laerdal SonoSim Ultrasound Solution for SimMom integrates diagnostic training and assessments.

VitalsBridge FM allows you to view and interact with vital signs from both fetal and maternal patient simulators and a commercially available patient monitor, increasing simulation realism.

SimNewB

Advanced training in neonatal resuscitation

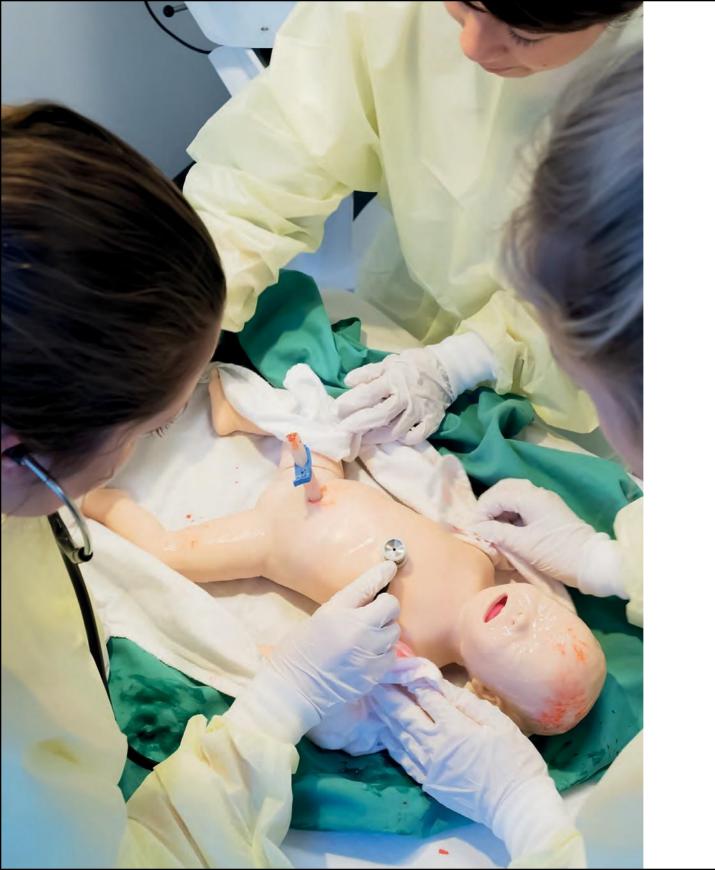

SimNewB is a newborn tetherless simulator co-created with the American Academy of Pediatrics, designed to help improve neonatal resuscitation and to meet the specific learning objectives of neonatal resuscitation protocols.

Focusing on the first 10 minutes of life, SimNewB provides realistic training for critical interventions such aslung recruitment maneuvers and advanced airway management.

296-00050 SimNewB, Light 296-00250 SimNewB, Dark

Developed in partnership with the American Academy of Pediatrics, SimNewB neonatal simulator will allow for new opportunities to integrate the latest technologies into neonatal training programs.

Pairing SimNewB and educational content developed and validated by organizations such as the American Academy of Pediatrics, like Neonatal Resuscitation Program™ scenarios, allows learners to master the skills needed to care for neonatal patients and ultimately improve patient outcomes.

MamaBirthie

Educating learners and improving competencies demands a wide range of high quality training tools. Identifying and managing potential adverse events can help ensure safe patient care.

MamaBirthie is ideal for training in birthing assessment and can be used for basic skill acquisition and competency development for all stages of labor. It can be used as atabletop model for demonstration or worn to facilitate simulation.

360-00033 MamaBirthie, Dark 360-00133 MamaBirthie, Light

Available in Light and Dark Skin Tones

MamaNatalie

MamaNatalie is a cost-effective way to deliver high impact in your obstetric simulation program. Learners can train on normal delivery and post-partum complications including post-partum hemorrhage to improve management of skills and communication from ambulance to delivery room. MamaNatalie comes with NeoNatalie newborn simulator, enabling learners to rehearse newborn resuscitation and train on birth asphyxia. Together they are designed to facilitate an engaging roleplay that will make the learning sessions memorable and efficient.

340-00233 MamaNatalie Complete, Dark 340-00333 MamaNatalie Complete, Light

PROMPT Flex

Patient safety initiatives aimed at addressing the potential for adverse events and medical errors are being implemented in many labor and delivery departments. PROMPT Flex is ideal for addressing high risk, low frequency events and reducing complications. The versatile and modular design provide the user with a comprehensive experience in all stages of birth and complexity. Suited for all learners in both professional education and healthcare providers.

LIM-80100 PROMPT Flex Birthing Simulator - Standard, Light LIM-80200 PROMPT Flex Birthing Simulator - Standard, Dark LIM-80106 PROMPT Flex Birthing Simulator - Advanced, Light LIM-80206 PROMPT Flex Birthing Simulator - Advanced, Dark

Expand your PROMPT Flex training opportunities by adding different modules, such as PPH, C-Section, Cervical Dilation & Effacement.

Premature Anne

Premature Anne is arealistically proportioned 25-week preterm manikin developed in collaboration with the American Academy of Pediatrics (AAP). Premature Anne is designed to facilitate the training of healthcare professionals in the initiation of proper care and resuscitation of preterm infants.

295-00050 Premature Anne, Standard

290-00050 Premature Anne, Task Trainer
290-00150 Premature Anne Task Trainer Twin
Pack

Developed in partnership with the American Academy of Pediatrics, Premature Anne will allow for new opportunities to integrate the latest technologies into preterm infant training programs.

Pairing Premature Anne and educational content developed and validated by the American Academy of Pediatrics allows learners to master the skills needed to care for preterm infants and ultimately improve patient outcomes.

Premature Anne supports the Neonatal Resuscitation ProgramTM.

NeoNatalie

NeoNatalie is an inflatable simulator designed to teach basic neonatal resuscitation skills. Developed to meet the key requirements for teaching the initial steps of resuscitation in the first ten minutes of a newborn's life, NeoNatalie is an effective, cost-efficient tool to enhance your training program.

104-10001 NeoNatalie Basic, Dark

104-10002 NeoNatalie Basic, Light

PreemieNatalie

PreemieNatalie is arealistic sized preterm baby simulator. It supports training in correct breastfeeding positioning and attachment, nasogastric and orogastric placement and tube feeding.

- Realistic size of a preterm baby (1.6kg, 32 weeks gestational age)
- · Train correct breastfeeding positioning and attachment
- Train in correct nasogastric and orogastric placement and tube feeding
- Use with MamaBreast Breastfeeding Simulator to practice essential newborn care and Kangaroo Mother Care
- Use with MamaNatalie Birthing Simulator to practice preterm labor and delivery as well as twin births

107-10133 PreemieNatalie, Dark 107-10233 PreemieNatalie, Light

MamaBreast

MamaBreast is a wearable simulator that allows highly realistic simulation of breastfeeding and breastmilk expression.

460-00033 MamaBreast Breastfeeding Simulator

Mama-U

Mama-U represents a postpartum uterus after birth. It supports training in treatment of postpartum hemorrhage and uterine balloon tamponade insertions and other postpartum uterus interventions. The model is ultra-portable and can be used asatabletop model for task training, or inside MamaNatalie for a complete birth simulation.

450-00033 LM Mama-U Postpartum UterusTrainer

340-00433 MamaNatalie Complete & Mama-U (Dark) 340-00533 MamaNatalie Complete & Mama-U (Light)

Sister-U Multi-Uterus Trainer

A multi-uterus trainer with realistic anatomy representing the uterus between pregnancies.

Sister-U can be used for a variety of interventions such as vaginal examinations, IUD insertion and removal, and for inspecting anteverted and retroverted positions of the uterus, aswell asfamily planning and menstrual hygeine counselling.

Sister-U was developed in collaboration with the Indian Federal Ministry of Health and Family Welfare and global partners.

440-00033 Sister-U Multi-Uterus Trainer

CarePlus Preterm Wrap

CarePlus is a pre-term wrap designed to help parents provide continuous and quality skin-to-skin care to their newborns.

The ergonomic wrap design keeps the baby securely in place with little strain on the shoulders and back of the parent.

950-00033 CarePlus Preterm W rap 950-00133 CarePlus Preterm W rap 10-pack

Nifty Feeding Cup

Nifty Feeding Cup is a reusable product for feeding breast milk to newborns with breastfeeding difficulties.

It is a simple to use, easy to clean and culturally appropriate feeding solution which allows the infant to control the pace of feeding. Nifty Feeding Cup has been developed and designed through a collaboration between the University of Washington, Seattle Children's hospital, PATH and Laerdal Global Health.

960-00033 Nifty Feeding Cup 3-Pack 960-00133 Nifty Feeding Cup 50-Pack

NeoBeat

NeoBeat is areusable, consumable-free, and easy-to-use heart rate meter that provides an accurate and continuous display of newborn heart rate.

NeoBeat takes seconds to put on anewborn's abdomen, and the instantaneous heart rate can help guide neonatal resuscitation.

Features

 NeoBeat uses dry electrodes to pick up an ECG-based signal, which is recommended by The International Liaison Committee on Resuscitation (ILCOR) 2015 guidelines as the most reliable way to measure newborn HR.

Current available methods in low resource settings include stethoscope or umbilical cord palpation, both of which either require a second pair of hands or interruption in care. NeoBeat takes seconds to put on the baby and provides a continuous and instantaneous digital display of the newborn HR.

- NeoBeat comes with a mountable charging stand for quick and easy access to the device.
- NeoBeat is reusable and consumable-free.

532-00033 NeoBeat

Available in select markets.

Contact your local representative for more information.

NEW Modular Skills Trainer

Achieve skills mastery from anywhere

The Modular Skills Trainer is a 16-in-1 portable solution for skills practice and competency development. Designed to fit the needs of today's nursing schools, learners can practice individually or in groups to transition from beginner to skills mastery.

Practice a wide array of patient care skills:-

- · Nasogastric Tube Insertion
- · Wound Care
- · Tracheostomy Care
- · Central Line Dressing Change
- Ostomy Care
- · Urinary Catheterization & Enema
- Injections
- · Intravenous Catheterization & Phlebotomy
- · Suppositories (rectal & vaginal)
- · Perineal Care
- · Oxygen Therapy
- · Nasal Swab
- G-tube Care

Available as part of the SimCapture for Skills with Modular Skills Trainer combined solution

Pediatric Intubation Trainer

Anatomically accurate reproduction of apediatric torso designed for teaching the differences in pediatric and adult anatomy for airway management procedures.

 Anatomically accurate airway allows sizing and insertion of various airway adjuncts: Oropharyngeal and nasopharyngeal airway insertion

Endotracheal tube insertion and securing

- · Bag valve mask ventilation
- · Tracheal suctioning
- · Manually generated carotid pulse
- · Closed chest compressions

255-00001 Pediatric Intubation Trainer

Consumables 250-21050 Airway Lubricant (45 ml)

Laerdal Neonatal Intubation Trainer

Laerdal Neonatal Intubation Trainer allows teaching of intubation skills on the newborn baby. Robust and realistic, this model allows students to undertake training that is directly transferable to the clinical setting.

- · Realistic anatomy of a newborn baby
- · Intubation (oral and nasal)
- · Bag-Valve-Mask ventilation
- Correct tube placement can be checked by practical inflation test

250-00101 Laerdal Neonatal Intubation Trainer

Consumables 250-21050 Airway Lubricant (45 ml)

NG Tube and Trach Care Trainer Torso task trainer designed for

Torso task trainer designed for instruction in the care of patients with respiratory conditions and the practice of gastrointestinal care procedures via nasal and oral access.

Features include anatomical landmarks, trachea, esophagus, simulated lungs, and stomach.

375-10001 NG Tube and Trach Care Trainer

Consumables 250-21050 Airway Lubricant (45 ml)

Laerdal Infant Airway Management Trainer

Realistic practice is the key to developing proficiency in airway management skills. The Laerdal Infant Airway Management Trainer provides the realistic anatomy of a three-month-old infant for teaching and practicing basic and advanced airway management skills.

- · Practicing of oral and nasal intubation
- Practicing use of LMA (Laryngeal Mask Airway)
- Correct tube placement can be checked by practical inflation test
- · Bag-Valve-Mask ventilation can be practiced
- · Sellick Maneuver can be performed
- · Stomach inflation
- · Realistic tissue simulation

250-00250 Laerdal Infant Airway Management Trainer

Consumables 250-21050 Airway Lubricant (45 ml)

Laerdal Airway Management Trainer

Realistic practice is the key to developing proficiency in airway management skills. The Laerdal Airway Management Trainer realistically simulates an adult airway, and the lifelike upper torso and head can be used to demonstrate and practice intubation, ventilation, and suction techniques. In addition, it can be used to demonstrate upper airway bronchoscopy and bronchoscopy guided endotracheal intubation.

Deluxe Difficult Airway Trainer

Pneumothorax Trainer

The Pneumothorax Trainer, with bilateral tension pneumothoraces and decompression portals in each axilla and subdavian region, is specifically designed for training professionals in the practice of chest decompression.

- · Anatomical landmarks aid in site location
- · Bilateral midaxillary and middlavicular sites available for decompression
- · Heimlich Abdominal Thrust Maneuver may be performed

AT Kelly Torso

The AT Kelly Torso combines central Central venous access and chest decompression training with the added feature of airway management

Cricoid Stick Trainer

Needle and surgical cricothyrotomy skills can be practiced on this model with interchangeable rigid and soft tracheas.

261-01001 Cricoid StickTrainer

Consumables

261-01150 Replaceable Trachea - Rigid 261-01250 Replaceable Trachea - Soft 261-01350 Replacement Neck Skin

Choking Charlie

Choking Charlie is an adult torso designed specifically for training students in the performance of the Heimlich Abdominal Thrust Maneuver.

102-00001 Choking Charlie

Consumables

102-00150 Simulated Boluses (4-Pack)

Blood Pressure Training Arm

Lifelike, adult arm with an electronic trainer designed for training the procedure of NIBP measurement.

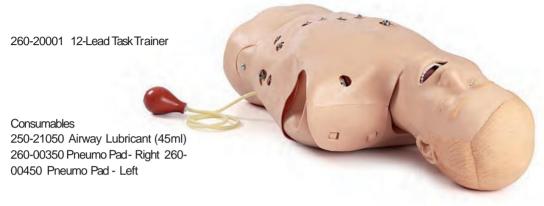

The SimPad Blood Pressure Training Arm allows for practice of non-invasive blood pressure (NIBP) measurement. Auscultated and palpated blood pressure simulation is possible.

375-42050 SimPad Blood Pressure Trainer 200-00550 Blood Pressure Cuff Assembly

12-Lead Task Trainer

Adult male upper torso with anatomically accurate landmarks designed to realistically simulate airway management scenarios and train students in the proper utilization of 12 lead ECG devices, including the proper connection of patient cable, acquisition and interpretation of 12 lead ECG, and understanding and utilizing the AMI algorithm and local protocols relating to treatment of suspected or confirmed AMI.

HeartSim® 200

The HeartSim 200 is a battery-powered ECG rhythm simulator designed to provide basic, modified, and pediatric rhythms with variable pulse rate and strength. This product offers all the necessary rhythms to conduct ACLS course in one compact, convenient unit.

260010 HeartSim 200 Cardiac Rhythm Simulator

292021 Heartsim 200 Link Cable

Symbio Rhythm Simulator

Easyto operate, the Symbio Rhythm Simulator is designed to meet both your training and equipment testing needs.

9851-008 Symbio Rhythm Simulator

Laerdal IV Torso

The Laerdal IV Torso allows practice of intravenous access techniques for both advanced cardiac life support and trauma, delivered by organizations around the world.

The Laerdal IV Torso enables the practice of IV access to the:

- · External jugular vein
- Internal jugular vein via the anterior, central and posterior approach
- Subclavian vein
- · Femoral vein
- A pulse bulb enables the instructor to create a palpable pulse in the manikin's arteries
- · Long catheters can be placed into the training model
- · Realistic tissue simulation
- Both Neck Padand Femoral Pad are replaceable
- · Pads can be replaced without use of any tools

090019 Laerdal IV Torso

Q-OPR Quick Review events statistics

CPRmeter app

Users can view and export stored sessions on a CPRmeter 2 device

By rotating the view within the app, providers can examine visual feedback of their clinical or training performance. This detailed view delivers insights on the depth, release, rate, and force of each compression. In addition, providers can annotate important events such as obtaining Return of Spontaneous Circulation.

Laerdal Pocket Mask

The Laerdal Pocket Mask's design, filter and one-way valve makes it aquality choice that provides protection during CPR.

Laerdal Silicone Masks

Depending on the shape and size of your patient, there is a Laerdal Silicone mask that fits. An airtight seal between the skin and the silicone enables the proper administration of air. The Silicone masks are completely transparent for visibility of the patients' nose and mouth, fit standard 15/22mm connectors and are compatible with the Multi-Function Mask Cover.

Penguin Suction Device

Babies' nasal passages can become blocked for many reasons including exposure to viruses or irritation from allergens. Clogged nasal passages can interfere with babies' ability to feed, and in very young newborns, their ability to breathe. Designed to clear babies' airways, the Penguin is made of one piece of silicone making it easy to clean and durable, able to withstand hundreds of uses. The Penguin was developed to support basic newborn resuscitation courses like Helping Babies Breathe.
